Receipt counts are a patient-visit proxy, not unique patients. ARPP = selected earned revenue / visits. New patients require supplied counts. Collections exclude funding and bank settlements and may differ from earned revenue. Salary/OT are actual cash/bank disbursements; compliance is mapped expense. Vendor counts include part-paid invoices once per month; reversals affect their posting month. Petty cash includes all non-top-up disbursements by default and can overlap salary/vendor classifications; rows are not an additive expense total. Colours show relative levels, not good/bad performance. Provisional/no-data months are identified; monthly completeness requires review.
